ABSTRACT

The field test report on the "Worker's World" instructional unit for grade 5 is one of a series of reports on the Arizona developed Career Education Curriculum Units. Presented is specific information as to the success of the units in terms of the learner's cognitive, affective, and psychomotor behavior according to expressed performance and behavioral objectives. Cognitive and student and teacher attitudinal data were collected from six sites and projects in Arizona. Following the introduction, a brief description of the unit is given. The body of the document presents and discusses various tables showing field test results in the following areas: (1) information describing the field test, including demographic characteristics of both participating teachers and learners, (2) attitudinal data from both teachers and learners concerning the unit, (3) learner performance data on the lessons' specific items, and (4) teacher recruitment, refinement data, analysis, and comments. Four brief conclusions and recommendations are included. The document concludes with two appendixes: statistics and tabular data on student and teacher attitudes and a sample of the field test instrument package--UNIVAL (forms and questionnaires on student and teacher attitudes and student performance). FOREWORD

So many have contributed major input to the field test processes of unit delivery, monitoring and instrument completion, that it is impossible to extract, note, and applaud individual efforts. I am sure that all those involved in this major team effort can see how much has been accomplished and have a positive view of its educational significance for the young people of Arizona. By documenting and analyzing the capabilities of the career education units tested, we all have contributed a positive boost to career education in school districts across the state.

The task of Field Test Manager has been simplified considerably by excellent staff support from the Mesa Public Schools Department of Research and Evaluation, responsive assistance from the State Department of Education, and the effective management shown by the field test coordinators from the respective field test projects.

PREFACE

This is one of a series of field test reports on Arizona developed Career Education Curriculum Units. This report presents unit specific field test material. Another report in this series contains information concerning overall field test rationale and compilation of results for all field tested units.

The work presented and reported herein was performed pursuant to contract from the Arizona State Department of Education. However, the opinions expressed herein do not necessarily reflect the position or policy of the Arizona State Department of Education and no official endorsement by the Arizona State Department of Education should be inferred.

APPENDIX I -- Additional Data

APPENDIX II -- UNIVAL

INTRODUCTION

The major purpose of most innovative programs such as career education is to affect positively learners' cognitive, affective, and psychomotor behavior according to expressed performance and behavioral objectives. The present field test of career education curriculum units is designed to examine the success of the unit in terms of the above. Cognitive and attitudinal data have been collected from sites and projects across the state of Arizona. The following projects were involved in the effort of field testing the units: Central Maricopa, Coconino, Mesa, Pima, Pinal, Roosevelt, Tri-County, WACOP, and Yavapai.

Data on the present unit, however, have been collected from the following sites:

Project	Classrooms Requested	Classrooms Used In Analysis*
Central Maricopa	3	3
Coconino	3	3
Mesa	3	2
Pima	4	3
Roosevelt	3	3
Tri-County	3	3
Total	19	17

*Data received in time for analysis.

Significant statistics are presented and discussed in the Field Test Results section of this report. Other statistics and tabular data are presented in Appendix I of this report.

UNIT DESCRIPTION

WORKER'S WORLD

Grade 5: Worker's World

The primary intent of this unit is to develop awareness of the components of the world of work. The learners will be made aware of these components, both individually and collectively, through classroom simulation.

The major topics included in this unit stress the physcial demands and the working conditions which may be found in occupations. The learners will examine the physical demands of present-day occupations through brief classroom simulations. The working conditions are also experienced through classroom simulations and discussed in detail.

FIELD TEST RESULTS

WORKER'S WORLD

This section of the report presents the data summary and analysis for the field test of the curriculum unit. An outline of this section follows:

A. A description of the field test including demographic characteristics of both participating teachers and learners.

B. Attitudinal data from both teachers and learners concerning the unit.

C. Learner performance data on the lesson specific items.

D. Teacher refinement data, analysis and comments.

DESCRIPTION OF THE PARTICIPANTS

The data in this report was obtained from the projects, teachers, and learners described in the following tables.

1. Learners

Table I presents demographic information on the learners that were exposed to the unit in the field test. Examining Table I, it can be seen that the male and female learners are fairly evenly represented. There was fairly high representation by the minority backgrounds: 16% (87) Spanish Surname, 3% (19) Black, 11% (60) American Indian, and 0.6% (3) Other.

2. Teachers

Table II presents the total number and selected demographic characteristics of the teachers presenting the unit.

It can be noted from Table II that 12 of the 17 teachers that taught this unit were female.

The median years of experience for this group falls between 6-10 years. It should be noted that this group of teachers was quite sophisticated concerning career education; seven had previously taught a career education unit or program and five had actually developed a career education unit or program.

TABLE III

ATTITUDINAL DATA

1. Teacher Attitude

Included in each UNIVAL (Unit Evaluation Instrument) was an Instructor Attitudinal Data Sheet which asked two questions concerning attitudes toward career education in general and three questions concerning the teacher's attitude toward the unit (see Appendix II).

a. Teacher Attitude Toward Career Education

Examining the teachers' general attitudes toward career education (Table III) it can be seen that the mean response across questions and projects is a very high 3.91, on a scale where 5 is the highest positive response. Of the 34 possible responses, 27 (80%) are positive toward career education, 5 (15%) are of no opinion, and only 2 (6%) negative.

b. Teacher Attitude Toward the Unit

Table IV summarizes the teacher attitudes toward the unit.

The teachers' high positive attitude toward career education carried over somewhat to the teachers' attitude toward the unit. The teachers show moderately high 3.65 positive attitude toward the unit. Of the possible 51 responses, 35 (69%) are positive, 8 (16%) are of no opinion, and 8 (16%) negative.

Total	2178	68	659	21	350	11	2.57

TABLE VII

NUMBER AND PERCENT OF CORRECT LEARNER RESPONSES TO LESSON IMBEDDED ITEMS FOR A GIVEN UNIT

PROJECT	NUMBER OF RESPONSES	NUMBER OF CORRECT RESPONSES	PERCENT OF CORRECT RESPONSES
Coconino	487	427	88
Central Maricopa	641	379	59
Mesa	1004	877	87
Roosevelt	483	447	92
Pima	213	200	94
Tri-County	426	332	78
Total	3254	2662	81

Correlations between the Teacher Attitude toward career education and Teacher Attitude toward the unit were significant at the .05 level. ($r = 0.53$) (Table V)

2. Learner Attitude

When Learner Attitude toward the unit is examined (Table VI), we see a fairly high positive feeling toward the unit across all projects. Of the 3187 responses 68% were positive toward the unit, 21% no opinion, and only 11% were negative toward the unit.

Correlations between the Teacher Attitude toward the unit and Learner Attitude were not significant (Appendix I).

LEARNER PERFORMANCE

In order to examine learners' performance on the unit, and to assess how well the objectives of the unit are met, cumulative scores over all the lesson items within the unit (total learner scores) were examined. Table VII presents the total learner scores in percentages by projects. This score reflects the unit's overall success concerning delivery of its objectives.

The scores from each project range from a low of 59% at Central Maricopa to a high of 94% at Pima. The responses with the exception of Central Maricopa appear uniform with

no one project varying far from the mean score (81%) thereby exerting a disproportionate influence.

Various other data was collected from the teachers involved in the field test of the units.

The data collected included the following information:

1. Teachers indicated whether they had experience in jobs other than teaching and whether this information helps in teaching the unit. It was found that 13 of the 17 teachers (77%) had previous experience in a job other than teaching. Of these thirteen, 9 (69%) indicated that the previous experience helped in teaching the unit. (Tables VIII and IX)
2. The teachers were asked how many guest speakers they used. Ten of the 17 teachers (59%) did not use guest speakers. A total of 16 guest speakers were used in the 17 classrooms. (Table X)
3. The teachers were also asked to indicate the amount of time devoted to the unit per week and what time of day (AM or PM) the unit was primarily taught. The median number of hours spent per week teaching the unit fell between 2-3 hours. Ten (59%) teachers taught the unit in the afternoon while 7 (41%) taught the unit in the morning. (Tables XI and XII)

TABLE VIII

4. The teachers were also asked what kind of classroom or method of teaching they used. Twelve (71%) of the classrooms were self-contained, 3 (18%) were open classroom and 2 (12%) were team taught. (Table XIII)

Correlations were calculated between the above data and Student Attitude, Teacher Attitude and Student Performance. No significant correlations were found.

TEACHER REFINEMENT, ANALYSIS AND COMMENTS

The field test teachers were asked to make comments regarding the strengths and weaknesses of the units. These comments were solicited in the UNIVAL.

The following represents a composite of teacher comments regarding the various aspects of the unit. These comments are presented as an aid to future users of this unit and as an indication of the strengths and weaknesses of the unit.

TEACHER COMMENTS

When reading the teacher comments it should be noted that not all teachers respond to the open ended items. Therefore, some of the responses seem inconsistent with the

teacher responses to the closed items. The closed items, it is felt, reflect a true attitude toward the unit over the teachers sampled. The teacher comments are from selected teachers that felt strongly enough to take the opportunity to respond. The comments are, therefore, more for curriculum refinement than for overall evaluation of the unit.

Central Maricopa

Math problems of Lesson 3 too hard. Took more time than suggested. Students were enthusiastic. Very interesting unit. Students and teachers really enjoyed unit.

Coconino

Needs to be more directly related to daily school activities. Unit did not seem to tie work with the real world of the job. The activities were enjoyable and stimulating and a very teachable unit.

Mesa

Needs more emphasis on character and not just physical attributes.

Roosevelt

This unit was tremendous and highly motivating and extremely careful in meeting its stated objectives. The stimulations were especially well conceived and received by the students. Math somewhat difficult.

Pima

More emphasis needed on jobs that require physical restraint. Good strategy guides and supplemental activities. Very useful unit.

Tri-County

Lesson 5 was difficult to do. Students enjoyed activities.

SUMMARY

The relevant data collected during the field test is summarized below:

1. A total of 543 learners were exposed to this unit in 6 of the 9 participating projects. Fifty-two percent of the learners were female and 31% representatives of minority backgrounds.
2. Of the 17 teachers that presented the unit 12 were female, the median years of experience was between 6-10 years, and 12 had taught or developed career education material.
3. Teachers expressed a very positive attitude toward career education in general (3.91 on a scale where 5 was the highest positive response). Though still positive, the teachers' attitude toward this particular unit was lower (3.65).
4. The learners also exhibited a positive attitude toward the unit with 68% of the 3187 responses positive, 21% no opinion, and 11% negative.
5. The learners' overall performance was high (81%) correct. There was very little variability across lessons and units.
6. A list of the teachers' critical comments and recommendations was presented in the body of this report.

CONCLUSIONS AND RECOMMENDATIONS

1. Future users of this unit should review the unit in its entirety paying particular attention to the content of each activity noting when during their teaching year it is best to be taught.
2. During installation the teachers, while not constrained by field testing, should be made aware that the lessons as presented are only suggestions and may be modified, resequenced, augmented or reduced as desired.
3. This unit presents a wide range of activity suggestions, many of which may be extracted to constitute an enrichment program in addition to the unit.
4. This unit was well received by both students and teachers. It is recommended that this unit be included in the implementation phase of curriculum development.

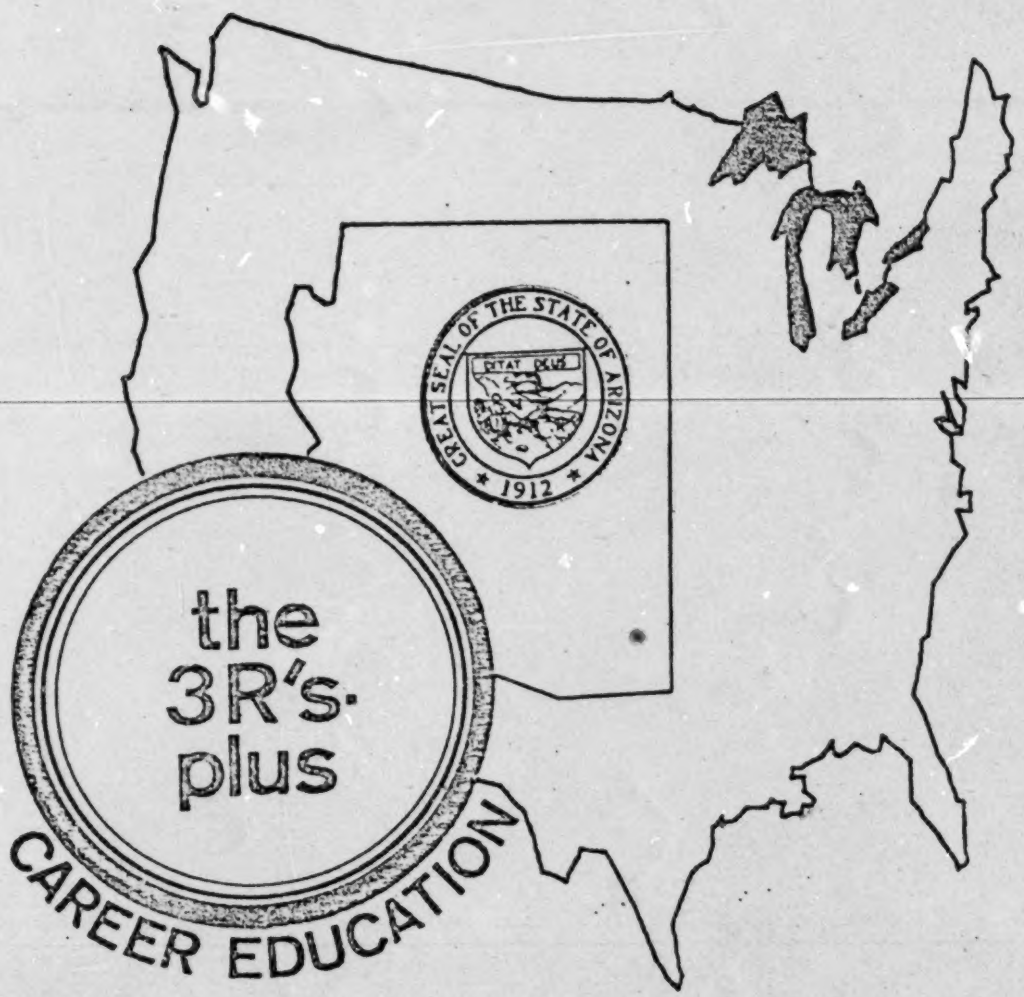
APPENDIX II

UNIVAL



Unit Evaluation
UNIVAL

THE WORKERS WORLD

GRADE LEVEL: 5

PART I

CAREER EDUCATION FIELD TEST
PROGRAM INFORMATION

Please print:

Instructor _____ School _____

Unit or Kit Title _____ District _____

Grade Level _____ Project _____

Date unit or Kit introduced in the classroom ____/____/____
mo. day year

Student data: (*the numbers should agree)

*Total number of students exposed to the unit _____

*Number of students of each sex: a. male____ b. female____

*Number of students in each ethnic group:

a. American Indian____ d. Anglo White____

b. Black____ e. Other____

c. Spanish Surname____

DIRECTIONS: Circle the letter of your answer in each of the following questions.

Teachers:

How many years have you worked in the field of education?

a. Less than one d. 11-15 years

b. 1-5 years e. More than 15 years

c. 6-10 years

Which of the following would best describe your exposure to Career Education (to date)? I have:

a. Developed a Career Education unit or program

b. Taught a Career Education unit or program

c. Read a Career Education unit or program

d. Had some exposure to Career Education

e. Had no exposure to Career Education

What is your sex?

a. Male____

b. Female____

Is your classroom: (more than one answer may be applicable)

a. Open____

b. Self-contained____

c. Team taught

What time of day were the lessons taught (predominantly)?

a. AM____

b. PM____

How much time did you devote to the unit each week?

a. Less than 1 hour

b. 1-2 hours

c. 2-3 hours

d. 3-5 hours

e. More than 5 hours

How many guest speakers were used in conjunction with the unit?

a. 0

b. 1

c. 2

d. 3

e. 4 or more

Have you had another occupation other than teaching?

a. Social sciences

b. Physical sciences

c. Chemical sciences

d. Business

e. Technical

f. Construction

g. Industry

h. _____

Did this experience help in teaching the Career Education unit?

a. Yes

b. No

PART II

Learner Performance Data

Directions: Please provide an indication of how well the lessons delivered the performance objectives. The lesson numbers and methods of evaluation for each have been indicated. Page numbers, objective specifications, and item numbers are indicated as appropriate. Please indicate the total number of learners responding. Then record the number that responded correctly. Complete this form as you teach each lesson of the unit.

		Method of Evaluation			Number of Learners	
Lesson Number	Page No. Item No.	Test	Checklist	Instructor Judgment	Responding	Responding Correctly
1	p. 24					
2	p. 37					
3	p. 52					
4	p. 73-74					
5	p. 84					
6	p. 98					

The Workers World
Grade Level 5

PART III

Instructor Attitudinal Data

Directions: Read each statement and place a check in the box under the heading that describes your response.

		Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
1.	Classes in my subject grade level would be more meaningful and relevant if focused around Career Education objectives.					
2.	Career Education is just another fad that will soon be forgotten.					
3.	After minimal revisions this unit will be ready for statewide distribution.					
4.	The learning activities were very effective in helping meet the performance stated.					
5.	The content of the unit relates directly to my regular class program.					

Indicate below any further comments concerning the strengths or weaknesses of the unit.

PART III (Continued)

Learner Attitudinal Data

On the following page is an attitudinal survey which we would like your learners to respond to. Please remove that page from this instrument and reproduce enough copies for each of your learners. We feel that it would be best if your learners responded to this survey at the completion of the unit. If your learners do not have the needed reading ability to complete the survey, please read and explain the items to them. After the learners have completed the survey, please tally their responses and record the total number of learners responding in each manner of the form provided below.

	YES	I DON'T CARE	NO
1.			
2.			
3.			
4.			

	HAPPY	OK	SAD
5.			
6.			
7.			

PART III (cont'd)

LEARNER ATTITUDINAL FORM

NAME _____

	YES	I DON'T CARE	NO
1. Would you want to know more about what we have learned in these lessons?			
2. Do you know more now about these lessons than before?			
3. Were the lessons interesting to you?			
4. Do you think that next year's class should be given these lessons?			
	HAPPY	OK	SAD
5. How did you feel about the lessons?			
6. How did most of your other classmates feel about the lessons?			7. How did your teacher feel about the lessons?
